

TAG

4

The new Tag 4 balances the proven strengths of the original Tag sink with improved design and functionality to offer a more operator friendly free standing handwash station. Using industry leading technology, the Tag 4 is a newly streamlined, high production capacity sink. With greater flexibility to hold almost any size soap and towel dispenser on the market while still fitting comfortably in most standard size portable restrooms for easy transportation, the Tag 4 is a superior handwash solution. Plus a new locking mechanism, easier suction port and freshwater tank access, and larger hand grips now on all four sides make the next generation Tag 4 an essential low maintenance, durable workhorse for your fleet.
